
Angelica Mora

Junior Web Developer | Senior QA Analyst

With five years in Quality Assurance specializing in Financial Services, complemented by recent experience as a junior web developer, I am seeking a Web Developer role. My combined background enables me to drive software quality through rigorous testing while understanding development practices firsthand.

My technical skills span full-stack web development including HTML, CSS, JavaScript, TypeScript, React, and the MERN stack (MongoDB, Express.js, React, Node.js), along with experience in both SQL and NoSQL databases. I bring strong testing capabilities through creating and executing manual test cases, utilizing tools such as JIRA, Confluence, and QMetry.

Additionally proficient in Git/GitHub, Apache Maven, IntelliJ IDEA, VS Code, Insomnia, Postman API, and Python fundamentals. I aim to leverage this diverse technical skillset and domain knowledge to contribute to software quality and development initiatives.

EXPERIENCE

2024 - Present

Kelly Education

Education Professional

- Implement curriculum plans effectively, ensuring educational content meets the needs of diverse student populations.
- Monitor and evaluate curriculum effectiveness through assessments and student performance data, making adjustments as needed.
- Differentiate instruction to accommodate individual learning styles and academic abilities, fostering inclusive classrooms.
- Assess student learning through formative and summative assessments, providing constructive feedback to students and parents.

2018 - 2023

InvestCloud, Inc.

Senior Quality Assurance Engineer

- Created and executed automated regression tests using proprietary framework which used Java, Selenium, and TestNG.
- Conducted functional testing across multiple browsers including Chrome, Safari, Firefox, IE11, and Edge, as well as on Apple and Android tablets and phones.
- Utilized JIRA for bug logging, tracking, and management.
- Developed and configured manual regression test cases using Qmetry.
- Authored and maintained content on Confluence with clarity and conciseness for internal audiences.
- Engaged in various QA activities, including weekly regression testing sessions.
- Working effectively with project and product managers, developers, and business analysts to establish test strategies, define scope, and assess test results.

2018

Hillsborough County Public Schools

Media and Technology Specialist

- Delivered library and research instruction and co-managed the Tech Detective Squad
 - Utilized software management programs for remote computer repairs, including laptop re-imaging, program installation, and settings configuration.
 - Provided technology and curriculum support for the school: managed devices for school-wide assessments, troubleshooting software issues, and maintenance of all school equipment.
-

2017

Queens Public Library: QPL

Senior Librarian - Corona Branch

- Managed acquisition and maintenance of materials and formats within the library collection databases.
- Engaged in outreach to local schools and community organizations.
- Developed collaborative partnerships regionally and internationally.
- Promoted, planned, and conducted bilingual early childhood development programs and clubs for families.
